

DANIEL UCHECHUKWU ADII

Data/Business Intelligence Analyst

Lagos, Nigeria | adiidanielu@gmail.com | 0806 795 4519 | <https://adiidanielu-ux.github.io> | www.linkedin.com/in/daniel-adii-860a95200

Detail-oriented Data Analyst with a strong foundation in data manipulation, modeling and visualization using Excel, SPSS, Power BI and SQL. Proficient in transforming complex datasets into actionable insights and passionate about leveraging data to drive business decisions.

SKILLS

- **SQL** (PostgreSQL, SQL Server)
- **Python** (Pandas)
- **Excel** (Xlookup, Pivot Tables, DAX, Data Modeling)
- **SPSS**
- **Power BI** (Data Modeling, Data Visualization, DAX)
- **Power Query**

WORK EXPERIENCE

DATA ANALYST (REMOTE)

2023-2025

- Performed end to end data analysis by cleaning, validating, and analyzing survey and research datasets using SPSS and Microsoft Excel, applying descriptive statistics, t-tests, ANOVA, Pearson correlation, and data visualization techniques to generate actionable insights.
- Partnered remotely with academic researchers, postgraduate students, and independent research clients across multiple projects, transforming raw datasets into statistical reports, dashboards, and visualizations that supported research objectives and evidence-based decision-making.
- Delivered data-driven findings that identified significant statistical relationships and demographic trends, producing publication-ready analyses and recommendations that strengthened client research outcomes, including studies involving datasets of up to 5,000+ respondents.

PROJECTS

SALES DASHBOARD WITH POWER BI

July 2026

- Built an interactive Power BI dashboard for a retail client using SQL, DAX, and data modeling to monitor sales KPIs and product performance.
- Cleaned and modeled sales data using Power Query, SQL, and Power BI, creating dashboards that improved visibility into sales, customer, and profitability trends.
- Delivered actionable insights that improved KPI visibility and enabled faster, data-driven business decisions.

EXPLORATORY DATA ANALYSIS

June 2026

- Imported, cleaned, and analyzed 50,000+ sales records using SQL, uncovering customer behavior and sales trends for a retail client.
- Developed advanced SQL queries using CTEs, joins, window functions, and aggregations to solve business problems and support decision-making.
- Identified top-performing products, high-value customers, and seasonal trends, enabling more effective sales and inventory planning.

MOVIE DATABASE ANALYTICS

June 2026

- Analyzed 5,000+ movie records using SQL, Excel, and data modeling, evaluating revenue, ratings, genres, and box office performance.
- Cleaned and visualized movie data using SQL and Excel, developing interactive reports to identify audience preferences and genre performance.
- Generated insights into top-grossing films and high-performing genres, supporting data-driven content acquisition and investment decisions.

BUSINESS ANALYSIS EXCEL

June 2026

- Cleaned and analyzed 1M+ business records in Excel using Power Query, PivotTables, and data modeling to improve data quality and reporting accuracy.
- Processed and modeled business data with Power Query, SQL, and Power BI, developing interactive dashboards for sales, customer, and profitability analysis.
- Delivered actionable insights that improved operational visibility and accelerated strategic decision-making.
